ABOUT

Obviously I am passionate about technology in all its aspects and in every field of application. I never settle for what I do and monotony is just what I would like to stay away from.

I am a skydiver so I expect a dynamic job, risky but above all not monotonous. I love people, I love working together and creating something out of the business environment.

I am optimistic and I am going to sleep with the thought that sooner or later I will have a revolutionary idea.

I saw a lot of similar cv, and I like problem solving, from mathematical games to the code of a program to create a cv in pdf without using illustrator (like this).

I strongly believe in cryptocurrencies. If you disagree, write me.

SCHOOL

Certificate in Computer Science at Itis Valturio, Rimini
2009-2013

Degree in computer engineering at Cesena
2013-2016

EXPERIENCE

Senior Front-End Developer - Conio srl

- 📅 January 2020 - Present
- 📍 Milano, Italia
- 📄 Responsible for all frontend apps. This includes some internal and external backoffices, company site and custom emails.
- 📄 Thanks to the promising junior frontend :), I: Lead of company site (full NextJS + TS + headless cms Storyblok, hosted with Amplify).
- Lead of B2B backoffice used by Conio and partner (React + TS + GraphQL + apollo + cypress).
- Lead of B2C backoffice used by Conio for OTC service (same stack).
- Maintenance of responsive transactional emails (custom gulp.js project).
- Drink a good beers with colleagues in the evening, and try to explain to new colleagues that crypto will be the future.
- 🔗 bitcoin crypto react graphql less typescript+ react-apollo typescript
- ☰ Company Site www.conio.com

Front-End Developer - Abstract

- 📅 April 2019 - December 2019
- 📍 Bologna, Italia
- 📄 development and release of applications installed in fairs and physical stores on behalf of Luxottica
- 📄 I deal mainly with the maintenance of projects developed with React. The sites are formed by an ui project and an api project. The first one is developed in react and graphql and the second one is developed in express + typescript + redis. The sites are developed for the totem used in a Luxottica brands stores
- 🔗 react vue js graphql less sass typescript+ redis WCS
- ☰ Rayban (e-commerce) <https://www.ray-ban.com/italy>
- Rayban (totem app) <https://www.rbemea.instore.oakley.com/rb/10523/it-IT>
- Salmoiraghi & Vigano (totem app) <https://www.svemea-dev.instore.oakley.com/sv/10029/it-IT>

EXPERIENCE

YNAP

Front-End Developer - Yoox-Net-A-Porter

November 2016 - April 2019

Zola Predosa, Bologna, Italia

Maintenance of 4 important e-commerce sites

I deal mainly with the maintenance of projects developed with .NET stack with js and css front-end side. The difficulty lies in the dependencies of other teams and therefore the coordination with them. I often develop in TDD and try to create internal tools if necessary

Technical tutor for a school project - Associazione Golinelli - Yoox-Net-A-Porter

May 2018 - December 2018

Bologna, Italia

Technical tutor

I joined the boys in the realization of a school project aimed at a realization by their school. The main task in addition to programming with the kids was to make them autonomous in just 4 months and explain some concepts of programming
