ABOUT

Obviously I am passionate about technology in all its aspects and in every field of application. I never settle for what I do and monotony is just what I would like to stay away from.

I am a skydiver so I expect a dynamic job, risky but above all not monotonous. I love people, I love working together and creating something out of the business environment.

I am optimistic and I am going to sleep with the thought that sooner or later I will have a revolutionary idea.

I saw a lot of similar cv, and I like problem solving, from mathematical games to the code of a program to create a cv in pdf without using illustrator (like this).

SCHOOL

Certificate in Computer Science at Itis Valturio, Rimini
2009-2013

Degree in computer engineering at Cesena
2013-2016

EXPERIENCE

Front-End Developer - Conio srl

📅 January 2020 - Present

📍 Milano, Italia

📄 Responsible for all frontend apps. This include an Admin Panel and the company site

📄 Develop and maintenance of an admin panel in React + GraphQL + Apollo. Sometimes I switch to Android (java) company applicatio (Conio on playtore)

`< >` bitcoin crypto react graphQL less typescript+ react-apollo typescript

Front-End Developer - Abstract

📅 April 2019 - December 2019

📍 Bologna, Italia

📄 development and release of applications installed in fairs and physical stores on behalf of Luxottica

📄 I deal mainly with the maintenance of projects developed with React. The sites are formed by an ui project and an api project. The first one is developed in react and grapql and the second one is developed in express + typescript + redis. The sites are developed for the totem used in a Luxottica brands stores

Salmoiraghi & Vigano (totem app)	https://www.svemea-dev.instore.oakley.com/sv/10029/it-IT

EXPERIENCE

Front-End Developer - Yoox-Net-A-Porter

📅 November 2016 - April 2019

📍 Zola Predosa, Bologna, Italia

📄 Maintenance of 4 important e-commerce sites

📄 I deal mainly with the maintenance of projects developed with .NET stack with js and css front-end side. The difficulty lies in the dependencies of other teams and therefore the coordination with them. I often develop in TDD and try to create internal tools if necessary

Technical tutor for a school project - Associazione Golinelli - Yoox-Net-A-Porter

📅 May 2018 - December 2018

📍 Bologna, Italia

📄 Technical tutor

📄 I joined the boys in the realization of a school project aimed at a realization by their school. The main task in addition to programming with the kids was to make them autonomous in just 4 months and explain some concepts of programming
