ABOUT

Obviously I am passionate about technology in all its aspects and in every field of application. I never settle for what I do and monotony is just what I would like to stay away from.

I am a skydiver so I expect a dynamic job, risky but above all not monotonous. I love people, I love working together and creating something out of the business environment.

I am optimistic and I am going to sleep with the thought that sooner or later I will have a revolutionary idea.
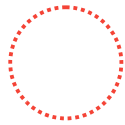

I saw a lot of similar cv, and I like problem solving, from mathematical games to the code of a program to create a cv in pdf without using illustrator (like this).

SCHOOL

Certificate in Computer Science at Itis Valturio, Rimini
2009-2013

Degree in computer engineering at Cesena
2013-201

EXPERIENCE

Front-End Developer - Yoox-Net-A-Porter

📅 November 2016 - Present

📍 Zola Predosa, Bologna, Italia

📄 Maintenance of 4 important e-commerce sites

📄 I deal mainly with the maintenance of projects developed with .NET stack with js and css front-end side. The difficulty lies in the dependencies of other teams and therefore the coordination with them. I often develop in TDD and try to create internal tools if necessary

developer	

Technical tutor for a school project - Associazione Golinelli - Yoox-Net-A-Porter

📅 May 2018 - December 2018

📍 Bologna, Italia

📄 Technical tutor

📄 I joined the boys in the realization of a school project aimed at a realization by their school. The main task in addition to programming with the kids was to make them autonomous in just 4 months and explain some concepts of programming
